

## Lymph-Tone III

**Lymph-Tone I, Lymph-Tone II, and Lymph-Tone III** were formulated to complement the clinical model devised by Dr. Hans-Heinrich Reckeweg, a German physician of the 20th century. Dr. Reckeweg postulated that symptoms are an expression of the body's progressive and strategic efforts to deal with toxins. His work, termed *Homotoxicology*, is represented in various tables depicting these progressive phases of tissue changes. The three major phases are often identified in a progressive sequence as Humoral, Matrix, and Cellular and correspond to **Lymph-Tone I, II, and III** respectively.

**Lymph-Tone III** is a homeopathic combination formula for compensatory symptoms such as exhaustion; weakness; apathy; disrupted sleep; difficult respiration; irregular pulse; sunken eyes; low-grade fever; loss of appetite; cutting, abdominal pain; migrating pains; boils; hair loss; dry, scaly, itchy skin; cysts; growths; painful, swollen veins; weak limbs; nerve pain; disrupted digestion.
